

If you want to use any of the example binds below simply replace “**yourkeyhere**” with your chosen bind key and copy and paste the line into the CSS console and press enter.

These commands should only work if the server is running SourceMods and you have admin access on the server, if you do not have admin access YOU (only you) will see a message in chat saying you do not have access to this command, the other players should not see anything.

`/sm_say`

This will display a message to all players in chat, but only if you have admin on the server.

`bind yourkeyhere "/sm_say your message here"`

`/csay`

This command will display your message in the centre of the screen (message displays for about 4 seconds)

`bind yourkeyhere "say /csay Bshopping is currently not permitted, See The Rules www.dying2kill.com.au"`

`bind yourkeyhere "say /hsay DTK ADMIN: FRIENDLY FIRE IS ON!! Please Do Not To Shoot Your Teammates FRIENDLY FIRE IS ON!!"`

`bind yourkeyhere "say /csay Please Be Respectful Obscene, Abusive, Sexist, Racist, Homophobic (any forms of bigotry) will not be Tolerated"`

`bind yourkeyhere "say /csay Accidentally shoot your teammates, please Apologise via Voice or type sry in chat"`

`bind yourkeyhere "say /csay DTK ADMIN: Player with the inappropriate name, please change it, Thank You"`

`bind yourkeyhere "say /csay DTK ADMIN: Please DO NOT shoot your teammates during warmup"`

Please do not share this document outside of the DTK Server #4 admin team.

`/hsay`

This command will display your message inside a box at the bottom centre of the screen (message displays for about 6 seconds)

bind yourkeyhere "say /hsay FRIENDLY FIRE IS ON!!! Please Do Not Shoot Your Teammates"

`/msay`

This command displays your message similar to the vote menu on the left hand side of the screen, players need wait 12 seconds OR press 0 to dismiss. Messages displayed this way could become very annoying.

bind yourkeyhere "say /msay FRIENDLY FIRE IS ON!! Please Try Not To Shoot Your Teammates"

`sm_tsay`

This command displays you message in the top left of the screen (limited to approx. 19 characters)

`sm_vote`

This command displays a custom vote on the left hand side of the screen (you can only start 1 vote every 40 seconds)

bind yourkeyhere "sm_vote We_just_played_this,_would_you_like_the_map_changed"

`sm_cancelvote`

Please do not share this document outside of the DTK Server #4 admin team.

This command cancels an active vote (ie: a player has started a vote ban, using this command will cancel it)

bind - "say /sm_cancelvote"

sm_kick

This command brings up the kick menu, if a player continues to break the rules, press this bind select their name and this will be kicked from the server. (it's a bit faster than going through all the menus while you are playing)

bind k "say /sm_kick"

General CSS commands, works for everyone.

key_listboundkeys

This command has nothing to do with admin, it simply shows a list of all the keys where you have setup a bind.

bind yourkeyhere "say /revote"

if a map vote is in progress but the list disappeared and you were unable to vote, this command will bring it back

There are many more commands but these are the probably the most relevant.

The information below is to remain private and must not be discussed on the DTK Forums or shared with anyone outside of Gun Game Admin's Private chat.

Server Name: TDs MapTest Server

Address: 167.179.143.7:27015

Password: 1562

The following people should have admin access.

TassieDevil

zarco

dead_man

Mircan123

squat

Jamie Luke

Chocolate Buddha
